

## **Audiffex Multi Drive Pedal Crack Free Download**

----- The new innovative product from Audiffex is intended to be an alternative to guitar effects and gadgets produced by popular companies. The instrument is quite similar to the famous Electro-Harmonix Micro-Pulser, which is designed specifically for DIY recording artists. The pedals have a clean sound similar to a tube amp, as well as an extremely neutral sound. The volume of the amp can be adjusted with a simple, transparent interface. In addition, the pedals are quite convenient to use because they can be placed even on a small desk, the pedalboards can be replaced by a right-hand side, and they are a compact instrument. Audiffex Multi Drive Pedal Features: -----

----- It is very important that it's not limited to only low frequencies. If you play a distorted tone, the final result is the harmonics resulting in a sparkling sound, instead of a muddy low-end, as well as a good balance between the low and the high frequencies. The pedalboard is characterized by a sturdy construction, a reliable operating system, a voltage of the power supply, excellent quality and stability of the component. The use of the product is very simple, even for beginners, because the product is not complicated and does not require special training. At the same time, the function of the device is unlimited, so you can expand the product to fit your style and your musical skills. ## **Audiffex Multi Drive Pedal With License Key**

The new KMACRO has an improved module and an enlarged sample memory. All the features of the current version are present. Microphone: the 48 kHz - 24 bit integrated microphone is sensitive, precise and with a large dynamic range. The MAUP\_PROTECT system allows safe monitoring of the sound signal during playback. The T-RECEIVER with built-in amplifier allows direct connection of an external power amplifier to the device without the need for external power supplies. Features: Records and reproduces audio or live input signals using the microphone or line input Connects via MIDI to any sequencer or DAW EQ Volume control Approx. 48 kHz-24 bit resolution Sample memory 8 direct-drive modeling speakers 15 effects (delay, flanger, chorus, modulation, distortion, high pass, modulation effects, EQ, resonance, gate, overdrive and compression) Aux 1 & 2 inputs Amp: The amp can be used as a low-end enhancer, when you need extra punch and extra low frequencies.

Distortion: High-quality distortion that produces the right balance of overdrive and compression, with the ability to produce distortions in the more aggressive distortion modes, as well as in the sound-natural mode with no overdrive. MIDI In/Out USB connection T-RECEIVER Long-range 50-Ohm outputs 4 inputs: 4 channels of direct monitoring inputs that record to a sample library. Channels 2,3,4 provide independent monitoring for the drum room Channel 1 is the stereo line input, which sends MIDI notes to the device. Channel 1 is routed via an input port to a blank instrument when no program is active Input 4 can be used to insert any analog input with a 0V - +12V signal Approx. 32kHz - 24-bit resolution MIDI In/Out USB connection USB In/Out: USB connection 3 outputs: 3x standard definition balanced line outputs for monitoring. Stereo line outputs to 2x active monitors Maximum headroom 20dB Approx. 32 kHz - 24-bit resolution Note: Does not connect to the mains. Highpass Contains various applications, which can be used to increase the low-frequency response, modify and smooth over the sound of the guitar amp. Applications: Increase the low 2edc1e01e8

## **Audiffex Multi Drive Pedal Crack + Full Version [Mac/Win] [April-2022]**

The Audiffex Multi Drive Pedal is especially designed for musicians and provides them with interesting plugins that simulate guitar gear, effects or speaker. With the help of Audiffex Multi Drive Pedal, you have the possibility to reduce the low-end part of the spectrum and gain more distorted, yet focused sound from the amp, adjust the output volume of the pedals, control the tone of the effect and modify the intensity of distortion. Features:

- Custom Distortion: - 3 different types of distortion effects: Chorus, Flanger, and Phaser
- Intuitive Operation: - 2-knobs volume and tone control - 4 EQ sliders: High, Mid, Low, and Wide
- Independent Volume Controls: - Each effect has an independent volume control
- Replaceable Filter Caps: - You can change the signal value without changing the actual sound. - 6 types of replaceable filter caps
- Realizable in 3 modes: - Direct, "Compressor on, Volume Control on" and "Compressor off, Volume Control on"
- Adjustable Amp and Tone Controls: - You can adjust the sound from 4 different amps and the volume control of each amp. - 7 slots for different types of tone, including Blend, Switch, Cutoff, Fuzz, Tremolo, Distortion, and Noise
- Remote Function Control: - Includes the ability to turn your stompbox on and off with a small remote control - Useful for those who have their amp and effects in different rooms
- Selectable Drive and Gain Controls: - You can select the drive and the gain from 5 types of distortion that work independently from each other. - High, Mid, Low, and Wide Gain controls
- Up to 3 Effects: - You can mix up to 3 effects in your chain
- 5 Output Levels (Low, Mid, High, Mix, and Off)
- Master Volume Control: - You can control the volume level from your main amp or speaker - The sound from your headphones or speakers will be directly controlled by the Master Volume
- 8-channel Inputs and Outputs
- Tones: - 1 Chorus - 2 Phaser - 2 Flanger - 3 Distortion
- Beveled
