We can clearly see that Photoshop has a more recent and constant presence in the online market, followed closely by the market leader which is Lightroom. It is important to note that while Photoshop holds the largest share in terms of monthly search volume, it is also important to note that, unlike the months of April, May, and September, the remaining 3 months are not at all close to being leaders. This means that in other months, software like **Website Concern (a product we recommend)** may be more popular - something that is worth considering. Lightroom is Adobe's cross-platform solution for managing your digital images. It has a powerful editing tool, integration with Photoshop, and capabilities for efficient and automatic workflow. Cross-platform compatibility means that Lightroom users have access to all current Photoshop features, including many essential digital imaging tools and a GPU-accelerated DNG RAW-file workflow.

Adobe Lightroom is designed for photographers and photo editors. It is an essential app for any digital photographer. Why? One important reason is that Lightroom's creative editing tools and built-in tools are what shoot to the top of Digital Photo-sharing sites such as Flickr and Blogger. Lightroom is also the essential app for all photographers, regardless of whether they use Photoshop. Lightroom is also the first Photoshop app that was designed by a team of photographers, and not based on what the software can do.

In short, Lightroom is currently the most popular photography app in the world (here's why). Users love the way it's organized, the audio guides that help them learn, and what it offers for RAW workflow. Photoshop no longer even comes close to offering its editing tools to people outside of the industry. The reason is that Photoshop isn't just for editing photos.

With 3 versions, each offering different features and capabilities, the software is too complicated for most photographers. Lightroom, on the other hand, is the right photography app for tens of millions of consumers, as well as the editorial world. 933d7f57e6
