

NoSQL Booster For MongoDB 4.7.2 Enterprise Edition

Need to install / update a Java. High, there is no other app for this job. Without the GUI, this takes a massive amount of time. Plus, I don't want to have. Q: Javascript forEach and append I am creating an autocomplete to search posts on my application. I have an array of objects like this `var posts = [{ title: 'post title', author: 'username' }, { title: 'post title', author: 'username' }, { title: 'post title', author: 'username' }, { title: 'post title', author: 'username' }];` I also have a search function, created by plugin autocomplete `var post = $('#search').autocomplete({ source: posts, html: true, multiple: true, onSelect: function(value, data){ $.each(posts, function(i, post) { console.log(post.title + ' + post.author); }); } });` The problem is when i search and select a item, I get this error: Uncaught TypeError: Cannot read property 'toLowerCase' of undefined Why this error is being thrown? UPDATE I have solved the problem. The code I have is something like: `var post = $('#search').autocomplete({ source: posts, html: true, multiple: true, onSelect: function(value, data){ var tt = this.selectedItem; var yee = $.map(posts, function(f, i) { return i; }); console.log(tt.toLowerCase()); } });` And of course my datasource is correct. This is how I get the selected item: A: `var posts =`
